

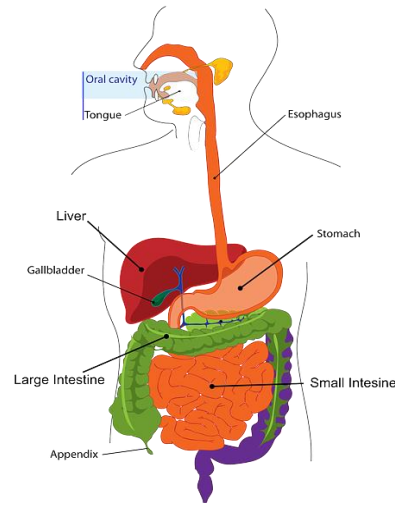

Graphic and textual components (Body systems)

I. Read the text and check (✓) the components you see.

Human body systems

152

The body is made up of many systems that all work together as a unit. Each body system has a particular function. Let's see their functions and parts.

Digestive system

Function: The digestive system takes nutrients from the food and turns it into energy.

Parts

Mouth. The mouth chews and breaks the food down into small pieces to be digested.

Esophagus. The esophagus delivers food to the stomach.

Stomach. The stomach digests the food with a mixture of digestive enzymes and acid.
